

**Course Number:** PEI508

**Course Name:** **Electronic Access Control & Security Systems**

**Length:** 1 HSW Continuing Education Hour

**Course Description:**

Electronic locks, whether offline, networked, hardwired or wireless, along with other access control components offer unique features and benefits that can enhance the security and safety of a facility. This course will help you understand your options when specifying products for an access controlled system and the questions you need to ask to be sure that it will do what is needed, now and in the future.

**Course Objectives:**

Upon successful completion of this course participants will be able to:

- ask appropriate questions to establish the access control needs for your client
- list electronic locking hardware components that are commonly used in access control systems
- determine the type of door monitoring needed for applicable openings
- specify the appropriate hardware for an access control system that will best fit the security and safety requirements of your client

*Mark S Unglaub, AHC/CDC/CSI*
