AIA Southwest Washington Continuing Education 2017 Series

CE Lunch Series:

Topic: Dealing with Contaminated Soil and Groundwater

May 25, 2017

12:00pm-1:00pm

PCS Structural Solutions

1250 Pacific Avenue Suite 701

Tacoma WA 98402

1 LU

Free for AIA Members

\$10 for non AIA

Lunch included

Provider: GeoEngineers, Inc.

Course Description:

Contaminated soil and groundwater can impact design and construction. The course will discuss typical impacts and mitigation measures related to contamination.

Course Objectives:

Upon successful completion of this course participants will be able to:

1. Understand typical impacts caused by contaminated soil and groundwater (soil disposal, water disposal, vapor intrusion, cross contamination between aquifers)
2. Understand typical mitigation measures (soil and groundwater management, vapor barriers, long term water disposal)
3. Understand area wide South Puget Sound contamination and typical sources of contamination in soil and groundwater
4. What to consider during predesign, design and construction to evaluate and mitigate contaminated soil and groundwater contamination.

RSVP by noon Tuesday, May 23 to Kris Schwarz by email aia@aiasww.org or call 253-627-4006
