Free for AIA Members  
\$10 for non AIA  
Lunch included

**Provider: Braley-Gray & Associates**

### General Description:

Hospitality and commercial restrooms have a major impact on how patrons perceive a building or business. A modern luxury restroom doesn't have to stop at simply meeting patrons' expectations for sustainability, hygiene, and functionality; it can do so while also making a striking minimalist design statement that is sleek and elegant. This course presents some of the sustainable, hygienic, functional, and distinctive options for modern luxury restrooms.

### Learning Objectives:

At the end of this program, participants will be able to:

- analyze a variety of materials for restroom fixtures in terms of their sustainability benefits
- explain the water conservation guidelines for WaterSense® labeled fixtures and how water efficiency can earn credits in the LEED® green building certification program
- discuss the elements of a restroom that contribute to the health and hygiene of patrons
- describe how hospitality and commercial fixtures meet ADA requirements while also upholding the principles of universal design
  
- define a modern minimalist style and explain how it can be used to design luxury restrooms that are sustainable, hygienic, and functional for all

Attendees can register for our presentation and can get their CEU certificates via this link: <https://signin.aecdaily.com/register/PXU2158>

**RSVP by noon February 14 to Bill Slone at email [bills@msgsrch.com](mailto:bills@msgsrch.com) or call 360-943-6774 ext 108**
